

Be Seen

Created for extreme working conditions, experience more from the workwear wardrobe with Brightskyn. The ultimate workhorse, it provides high visibility on site, road and rail and controls body temperature without compromise to boost flexibility and performance.

Skyn technology helps the active worker control their body climate with ease in order to aid concentration and promote professionalism. It keeps the skin dry and cool in all environments, so the worker remains focused on the job whatever it throws at them.

Practical on all levels, Brightskyn is lightweight and requires low maintenance so that energy can be channelled into work, not laundry.

Be seen, dressed for the challenge!

Brightskyn is available in 3 different weights of fabric and a wide range of standard and bespoke applications. Speed of delivery, high quality product and exceptional service levels are delivered with an extensive choice of size and colour designed to surpass expectation and ensure high satisfaction. Demand more from your budget.

Brightskyn Stats:

- Available in 100% Hydrophilic wicking Polyester, Coolskyn or 100% Polyester Fleece, Thermoskyn.
- The Brightskyn range of fabrics possess all the technical properties of Coolskyn and Thermoskyn coupled with compliance to BS EN 471:2003 Class 2 & 3 for both yellow and orange fabrics. In addition to BS EN471, orange Brightskyn, meets standard GO/RT 3279 Issue 5 2000, therefore ensuring Brightskyn is suitable for use within railway environments.
- All Brightskyn garments are supplied with Brightskyn neck label, swingtag and external side seam label (optional).
- Brightskyn conforms to current employment safety laws and regulations.

Tested to the Limits:

Brightskyn is a range of high performance 100% Polyester fabrics, developed specifically to conform to EN471 High Visibility and keep the wearer dry, warm and comfortable in all conditions and climates. Unrivalled in its sector Brightskyn garments have passed tests including: BS EN 471:2003 Class 2 & 3
GO/RT 3279 Issue 5 2000

All other test reports are available on request.

The Technology stripped back:

High Visibility

Ensures high visibility clothing standards during the day and night. It shines in poor light and adverse weather conditions.

Rapid Moisture Transfer.

Coolskyn fabric wicks away sweat fast. Avoids 'skin cling'.

Colour retention.

Tough and durable, it delivers constant retention of colour and shape when subjected to light, chlorinated water, sea water, water and perspiration.

Industrial Strength

Designed for domestic and commercial washing (up to 95 degrees) and disinfecting.

Ultimate Pill Resistance

Appearance is everything. The surface area is built for heavy use and repetitive movement. It fights abrasion.

Water Vapour Permeability

As the body turns up the heat, Brightskyn comes alive. Water Vapour is pulled through the fabric and it 'breathes'.

Dimensional Stability

Created for extreme wear and washing, the nature of the weave laughs in the face of shrinkage.

UV Protection

Coolskyn provides the ultimate sunblock. Certified UVPF 50+ (dark colours), UVPF 30+ (White), UVPF 22+ (Yellow and Orange).
