

## Be Seen

Created for extreme conditions, achieve more from life's playground with Brightskyn. The ultimate sports fabric, it provides high visibility and controls body temperature without compromise to improve pb's, and performance.

Skyn technology helps the athlete control their body climate, energise and play to win without distraction. It works by keeping skin dry and cool, whatever the adventure, to keep focused on the goal.

Brightskyn is lightweight and requires low maintenance so that energy can be channelled into sport, not laundry.

## Be seen, dressed for the challenge!

Brightskyn is available in 3 different weights of fabric and a wide range of standard and bespoke applications. Fast turnarounds, high quality product and exceptional service levels are delivered alongside an extensive choice of size and colour, designed to surpass expectation and ensure high satisfaction. Demand more from your budget.

### Brightskyn Stats:

- Available in 100% Hydrophilic wicking Polyester, Coolskyn and 100% Polyester Fleece, Thermoskyn.
- The Brightskyn range of fabrics possess all the technical properties of Coolskyn and Thermoskyn coupled with compliance to BS EN 471:2003 Class 2 & 3 for both yellow and orange fabrics. In addition to BS EN471, orange Brightskyn, meets standard GO/RT 3279 Issue 5 2000, therefore ensuring Brightskyn is suitable for use within railway environments.
- All Brightskyn garments are supplied with Brightskyn neck label, swingtag and external side seam label (optional).
- Brightskyn conforms to current employment safety laws and regulations.

### Tested to the Limits:

Brightskyn is a range of high performance 100% Polyester fabrics, developed specifically to conform to EN471 High Visibility and keep the wearer dry, warm and comfortable in all conditions and climates. Unrivalled in its sector Brightskyn garments have passed tests including: BS EN 471:2003 Class 2 & 3  
GO/RT 3279 Issue 5 2000  
All other test reports are available on request.

### The Technology stripped back:

#### High Visibility

Ensures high visibility clothing standards during the day and night. It shines in poor light and adverse weather conditions.

#### Rapid Moisture Transfer.

Coolskyn fabric wicks away sweat fast. Avoids 'skin cling'.

#### Colour retention.

Tough and durable, it delivers constant retention of colour and shape when subjected to light, chlorinated water, sea water, water and perspiration.

#### Industrial Strength

Designed for domestic and commercial washing (up to 95 degrees) and disinfecting.

#### Ultimate Pill Resistance

Appearance is everything. The surface area is built for heavy use and repetitive movement. It fights abrasion.

#### Water Vapour Permeability

As the body turns up the heat, Brightskyn comes alive. Water Vapour is pulled through the fabric and it 'breathes'.

#### Dimensional Stability

Created for extreme wear and washing, the nature of the weave laughs in the face of shrinkage.

#### UV Protection

Coolskyn provides the ultimate sunblock. Certified UVPF 50+ (dark colours), UVPF 30+ (White), UVPF 22+ (Yellow and Orange).
