

Stay Cool

Created for extreme working conditions, achieve more from the corporate wardrobe with Coolskyn. The ultimate workhorse, it devours sweat without compromise, enabling the wearer to keep a cool head at all times.

Skyn technology helps the active worker control their body climate with ease in order to aid concentration and promote professionalism. It works by keeping the skin dry and cool in all environments, so the worker remains focused on the job whatever it throws at them.

Practical on all levels, Coolskyn requires low maintenance so that energy can be channelled into work, not laundry.

Dress for the challenge!

Coolskyn is available in a wide range of standard and bespoke applications. Fast turnarounds, high quality product and exceptional service levels are delivered alongside an extensive choice of size and colour designed to surpass expectation and ensure high satisfaction. Demand more from your budget.

Coolskyn Stats:

- 100% Hydrophilic wicking Polyester
- Available in Pique or Eyelet Knit
- All Coolskyn Garments are supplied with Coolskyn neck label, swingtag and external side seam label (optional).
- Also benefiting from Coolskyn fibre technology is a range of EN471 High Visibility garments called Brightskyn.

Tested to the Limits:

Coolskyn is a high performance 100% polyester fabric developed specifically to keep the wearer dry, cool & comfortable in all working conditions and climates.

Unrivalled in its sector Coolskyn garments have passed the following tests:

- Vertical Wicking – Shirley Method 28

- Resistance to Pilling BS EN ISO 12945-1:2001, 36,000 revolutions (10 hours)
- Water Vapour Permeability BS 7209: App B 1990 (1997)
- Dimensional Stability BS EN25077:1994- 60°, 75°
- Ultra Violet Protection EN13758-1, Certified UVPF 50 + (dark colours) and UVPF 30+ (White).
- Dry linting propensity BS6909
- Anti Static PR EN 12477:1996, PR EN 1149-2, PR EN 1149-3:2001

The Technology stripped back:

Ultra Rapid Moisture Transfer – otherwise known as 'Stay Dry Technology'

Coolskyn wicks away sweat, transporting it to the face of the fabric where it evaporates, expelling the feeling of coldness and avoiding 'skin cling'.

Colour Retention.

Tough and durable, it delivers constant retention of colour and shape and is colourfast to saltwater, sun and chlorine

Ultimate Pill Resistance.

Appearance is everything. The surface area is built for heavy use and repetitive movement. It fights abrasion.

Water Vapour Permeability

As the body turns up the heat, Coolskyn comes alive. Water Vapour is pulled through the fabric and it 'breathes'.

Dimensional Stability

Created for extreme wear and washing, the nature of the weave laughs in the face of shrinkage.

UV Protection

The ultimate sunblock for hard core sports. Coolskyn blocks 98% of UV radiation.

Anti Static Fabric

Coolskyn's anti static properties will reduce the amount of static within the workplace.
